## CAPABILITIES

The company started to develop different kinds of radio-controlled model products (airplane, cars, boats, etc.). Due to the thoughtful design of their aircraft and car series, the DIY time and damage rate is greatly reduced which makes these products win great popularity among consumers. Currently P-15 jet engine is in the production and P-60 jet engine is still under development.

## PRODUCTS

Radio control model products, model engines, engine accessories, radio control targets, micro turbojet engines, turbine educational unit, RIC servos.
